#### 1. NATURE OF OPERATIONS AND GOING CONCERN

Gen III Oil Corporation (the "Company" or "Gen III Oil") was incorporated under the laws of British Columbia and continued its incorporation into Alberta on December 6, 2017. The Company holds patents to the ReGen<sup>TM</sup> technology and plans to use the technology to re-refine used motor oil into high quality base lubricating oils.

These consolidated financial statements have been prepared on the basis of accounting principles applicable to a "going concern", which assumes that the Company will continue its operations and will be able to realize its assets and discharge its liabilities in the normal course of operations for the foreseeable future. At March 31, 2020, the Company had a working capital deficit of \$3,328,037 had not yet achieved profitable operations and expects to incur further losses in the development of its business. For the three months ended March 31, 2020, the Company reported a net loss of \$1,288,737 and comprehensive loss of \$1,300,221 and as at March 31, 2020, had an accumulated deficit of \$92,284,403. The Company has not generated revenues from operations. The Company is dependent on debt and equity financings to fund its operations. Management of the Company believes that the current level of funds is not sufficient to pay for expected cash expenditures over the next 12 months. The recoverability of the underlying value of the Company's assets is entirely dependent on the Company's ability to obtain the necessary financing to complete development of the ReGen<sup>TM</sup> technology, and future profitable production. The Company's ability to obtain financing may be subject to additional risks brought on by the current Covid-19 pandemic such as, but not limited to, temporary business closures, travel restrictions, quarantines, the general market uncertainty and reduced economic activity. These material uncertainties may cast significant doubt upon the Company's ability to continue as a going concern. The Company's consolidated financial statements for the three months ended March 31, 2020 do not reflect the adjustments to the carrying values of assets and liabilities and the reported expenses and statement of financial position classifications that would be necessary should the going concern assumption be inappropriate, and such adjustments could be material.

#### Covid-19 Pandemic

In March 2020, the World Health Organization declared a global pandemic related to the virus known as Covid-19. The expected impacts on global commerce are anticipated to be far reaching. To date, there have been significant stock market declines, and the movement of people and goods has become restricted. The lubricating oils sector has and is expected to be impacted as many local and regional governments have issued public health orders in response to Covid-19, including restricting the movement of people. The worldwide demand for lubricating oils and the resulting generation of used lubricating oils has declined as a result of decreased manufacturing production, decreased transportation and a decreased demand for products and materials in general. Prices for new and used lubricating oils have declined and continues to fluctuate as a result of uncertainties caused by the pandemic.

As the duration of the Covid-19 pandemic and its continuing effect on the economy is unknown at this time, the Company continues to gather information and assess the impact of this pandemic on the future of its development plans.

As the Company does not currently have production activities or revenues, the ability to fund ongoing operations is affected primarily by its access to capital. Due to market uncertainty the Company may be restricted in its ability to raise additional funding. The impact of these factors on the Company is not yet determinable. However, they may have a material impact on the Company's financial position, results of operations and cash flows in future periods. In particular, there may be heightened risk of asset impairment and liquidity or going concern uncertainty. As a result, impairment indicators for the Company's assets and/or a decline in their fair value could arise in 2020 if current conditions persist.

The Company's address is Suite 1750 - 400 Burrard St. Vancouver, B.C., V6C 3A6, Canada.
